

IMAGING ENDPOINTS
CONNECTING IMAGING TO THE CURE

Global Experts in Imaging Research and FDA Compliant Core Lab Services

- Imaging Endpoints is a leader in the integration of imaging into clinical development to accelerate outcomes and improve success.
- Affiliate of Scottsdale Healthcare, ranked among top 50 US Health Systems, and affiliate of Scottsdale Medical Imaging Limited, ranked as the 9th largest private radiology practice in the US.

Imaging Research Services:

- Our *Rapid Detection and Assessment of Response program (RADAR)* is designed to accelerate product development by integrating new, more powerful imaging technologies into clinical trials.
- In-house radiology experts evaluate your unique compound, target and mechanism-of-action and harness the power of imaging to improve and/or accelerate data on product efficacy.
- We integrate novel imaging with biologic, clinical & lab data to measure activity and assist with “Go/No-Go” and “Go Where” decision making to help develop targeted Phase II trial designs.

Imaging Core Lab Services:

- We deliver fully compliant and comprehensive imaging CRO services with exquisite technology, deep expertise and unparalleled service.
- Our iCRO experience extends from translational to phase III and IV analysis and every step in between.
- Imaging Endpoints provides real-time reads for trials that include hundreds of clinical sites globally.
- Our affiliate company is one of the nation’s largest imaging sites.
- We customize our services to meet your specific needs.
